THE COMPANY

FORANI TEATRE was founded in 2006 when Arnau Colom and Enric Rovira met in The School of Theatre Studies of Barcelona. They joined forces with the intention of creating shows aimed at all audiences.

The company, focused on creation and education work, advancing the constantly exploring new languages that result in performances with their own unique label.

The duo takes care of every detail regarding the show, that is, the whole process of creation from the beginning until the show is with the audience: the story of creation, construction of sets and puppets, costume design, staging, composition of the soundtrack, etc.

This way they ensure that the idea behind each show is present in each aspect of it and their professional touch present at all times.
